

POSITION: Chemist – Waterborne Coatings
JOB ID: 3007
LOCATION: Illinois
COMPENSATION: \$70,000

JOB PROFILE:

Seeking a dynamic individual to join the Research & Development Team with responsibility for the formulation, testing, and successful commercial launch of primers, adhesion promoters, solvent borne lacquers, and interior automotive coatings.

Responsibilities include:

- New product development
- Modifications of existing products to meet new customer demands
- Problem solving and technical support for internal and external customers
- Occasional travel for customer/OEM presentations, new product launches, and FTS assistance when required
- Work in a safe manner following all laboratory safety guidelines
- Monthly report prepared for the Group Leader
- Communicate and present project results in a clear and concise manner to technical management
- Clear documentation of all lab work in the assigned lab book and project files

REQUIREMENTS:

- Bachelor of Science degree (or higher) in Chemistry, Chemical Engineering, Biology, or science related degree
- Fluency in Japanese or Korean language and direct knowledge of Japanese culture
- Experience with waterborne interior coatings, adhesion promoters, or primers
- Knowledge of AS400 and SAP systems as it relates to formulation needs
- Experience with spray application methods used for solvent borne and waterborne coatings
- Research and Development Experience
- Strong math skills and ability to analyze technical results
- Good computer skills in MS Word, PowerPoint, and Excel
