

POSITION: Applications Chemist  
JOB ID: 3008  
LOCATION: Springfield, MA  
COMPENSATION: \$60,000 - \$70,000

**JOB PROFILE:**

Seeking a dynamic individual for Applications Chemist position located in Springfield, MA. In this position, the candidate is charged with executing and completing all laboratory activities identified by the Applications Manager/Business Team with minimal supervision, to support applications development programs and provide customer service support. The role will work with the business' commercialized products, other manufacturer's raw materials and support Technology's new product development efforts, as needed.

**Responsibilities include:**

- Planning, executing and managing laboratory projects within the defined market segments of the Specialty Additives Business.
- Writing and maintenance of reports, procedures and standard operating conditions.
- Proactive management of lab activities, including maintenance of equipment, chemical inventory and MSDS'
- Communicating with customers where appropriate, to answer queries and resolve technical issues.

**REQUIREMENTS:**

- The candidate will have a BS in Chemistry or related field with 5-8 years experience in coatings formulation, primarily in water-based systems.
- Experience in solvent-borne coatings will be a plus.
- Good understanding of broader based coatings/adhesive/ink applications & related formulation techniques is required.
- The ability to interface deeply at the technical level with customers' process/technology personnel to understand their materials and processes and make recommendations on how to use our products within their formulations, will be key to success in this role.
